

Works Notification

Site establishment and temporary car park closures Sunshine station

28 September - 30 October 2020

As part of the Sunbury Line Upgrade, we are delivering power upgrades that will enable bigger, more modern trains to run on the Sunbury Line. To prepare the rail corridor for future works, we will be undertaking trenching works through the Sunshine station commuter car park, to assist in upgrading equipment in the electrical substation.

What we are doing

- Establishing a project site compound including worker amenities, project staff car parking and a shipping container for the storage of construction materials
- Installing temporary fencing around the perimeter of the site
- Temporarily closing up to 25 parking spaces for one month within the Sunshine station commuter car park on Sun Crescent, to facilitate the installation of site amenities
- Trenching works, asphalt sawing and operation of non-destructive digging (NDD) trucks will then facilitate the installation of underground services and pits. NDD uses pressurised water to break up and vacuum soil, exposing assets and services without damaging them
- Asphaltting over excavated trenches and returning the car park for commuter use.

When

Site establishment activities

- 7am to 6pm, Monday 28 September to Friday 2 October.

Temporary car park closure

- 6am Monday 28 September to 6pm Friday 30 October.

Site use and construction activities

- 7am to 6pm weekdays and 7am to 1pm Saturdays, Monday 5 October to Friday 30 October.

Out of hours works

- 1pm Saturday 10 October to 7am Monday 12 October.

What to be aware of

- These works are expected to generate medium to high levels of noise and low levels of vibration
- There will be an increase in construction vehicles travelling on local roads to access Sun Crescent
- Traffic controllers will be present at times to assist construction vehicle access, pedestrians and cyclist movements to Sunshine station
- Alternative parking will be available in the City Place and Monash Street commuter car parks
- Generator-powered lighting towers may be required at night for safety. Where possible, they will be directed away from residential properties and businesses
- For the safety of rail users and our workers, some of these activities can only be performed out of hours when trains are not running
- Further works may be required at this site in future. Notification will be provided should additional works be required at a later date.

Health and safety

The Sunbury Line Upgrade is a critical state infrastructure project under Stage 4 restrictions, allowing work to continue with strict health and safety measures in place.

The health and safety of our workers and the community is our key priority and we have measures in place to protect the safety of our construction workforce, including temperature screening, additional protective equipment including masks, daily health screening of workers, enhanced cleaning, staggered shifts and break times, and physical distancing.

Our workforce numbers across Victoria's Big Build have already been significantly reduced to support directions from the Chief Health Officer, and we are continuing to manage the number of staff and visitors attending our worksites.

Keeping you informed

Coronavirus Stage 4 restrictions are changing the way we communicate our project works and disruptions and our distribution partners are unable to deliver project information to your letterbox during this time.
