

Works Notification

Site and service investigations and site establishment Sydenham

12 September - Late 2019

To enable greater capacity on the Sunbury Line, we are delivering platform extensions, accessibility upgrades and new stabling as part of the \$2.1 billion Sunbury Line Upgrade.

To support preparatory works in the rail corridor, we are establishing a temporary construction site next to the rail corridor, near the corner of Victoria Road and the Melton Highway in Sydenham.

We will also be conducting site and service investigations at Watergardens station to prepare the rail corridor for new infrastructure.

What we are doing

Construction site establishment

- Two work site caravans will be lifted in place during normal construction hours in September
- This site will support preliminary investigations and geotechnical surveys along the Sunbury Line
- The site will be used for storage of materials, worker amenities and construction vehicle parking until late 2019.

Site and service investigations

- Non-destructive digging (NDD) trucks will operate to investigate the location of underground services. NDD uses pressurised water to break up and vacuum soil to expose assets and services without damaging them
- Drilling into the ground to obtain rock and soil samples to help us gain a greater understanding of local geological conditions.

When

Construction site use

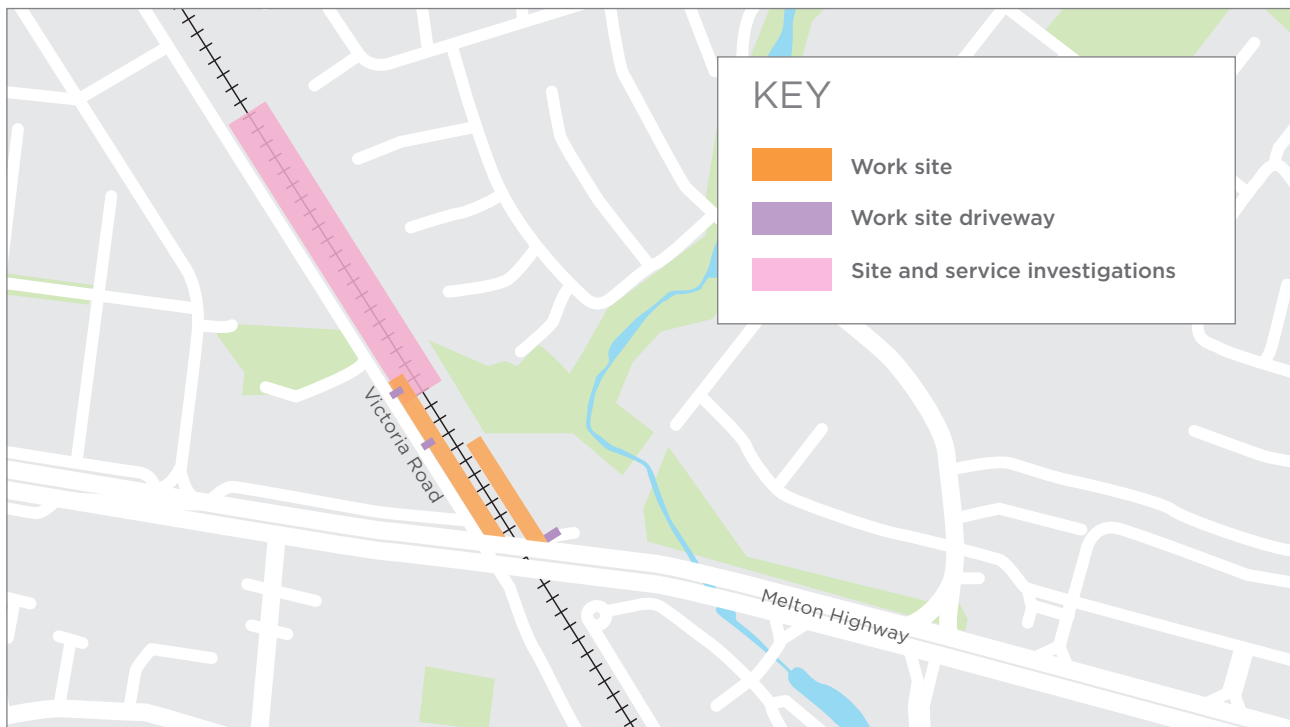

- 7am to 6pm, Monday to Friday
- 7am to 1pm, Saturdays.

Site and service investigations

- 7am to 6pm, Thursday 12 September to Friday 13 September
- 7am to 6pm, Monday 16 September to Friday 20 September.

What to be aware of

- Low to medium levels of noise and vibration are expected during site establishment activities and site and service investigations
- Noise levels during ongoing use of the Victoria Road site will vary. Information will be provided in future notifications to residents describing noise levels for specific construction activities
- Construction vehicles will access the site via Victoria Road and the Melton Highway
- This site will be used to support out of hours works as required. Notification will be provided to residents prior to the site being used for out of hours work
- Generator-powered lighting towers will be used during any future nightworks. Where possible, they will be positioned to face away from residential properties.

Travel changes

Works are now underway in preparation for a major rail construction blitz commencing at the end of September. This 13-day period will see an unprecedented amount of 24/7 work completed along the Sunbury line that can only take place when trains are not running.

To ensure the 24-hour works can take place safely, buses will replace trains between Flagstaff and Sunshine stations on the Sunbury line from **11.15pm Saturday 28 September to 9pm Friday 11 October**. For further details and to plan your journey, visit ptv.vic.gov.au

AFL Grand Final, Saturday 28 September

The project team have carefully planned the timing of these works to ensure impacts to those travelling to the AFL Grand Final day and evening are minimised.

Rail construction blitz pop-up session

We invite you to join us for an upcoming pop-up information session at Watergardens station.

Members of the project team will be present to share information and answer questions about works and disruptions in your area. Come say hello and grab a free coffee on us from **6am to 9am Tuesday 17 September**.
